

BY OUR CUSTOMERS

These hoses look much better than the OEM. Slightly larger diameter but fit in all clips just fine. The hardware on the ends of the hoses is much better.

"they [hydraulic hoses] fit without any problems and appear to be of superior quality to the OEM hoses."

"The best thing I can say they work fine with no problems and will last longer than any you get from dealer."

"You shouldn't have any reservations about Marvin, should you be thinking about using his services, he's professional, hardworking, and Knows What He's Doing, when it comes to this repair."

"I've used the convertible far more since the replacement was done and without worry of any ruptures. A+++++ "
